študijskih obveznosti:**

| | |
|-------------|-------|
| Ni pogojev. | None. |
|-------------|-------|

Vsebina:

- Jezik in govor: razvoj govora v prvem in tujem jeziku, teorije o jezikovnem razvoju in modeli učenja in poučevanja tujega jezika splošno in s poudarkom na začetnem učenju v predpubertetnem obdobju; značilnosti mlajših učencev
- Jezikovna zmožnost, sporazumevalna zmožnost ter jezikovne in sporočanjske spretnosti v tujem jeziku
- Pouk tujega jezika na nižji stopnji OŠ: sestavine kurikuluma, integracija vsebin, metod, tehnik in strategij pri tujem jeziku v pouku na nižji stopnji OŠ
- Organizacija in načrtovanje pouka tujega jezika na nižji stopnji OŠ
- Preverjanje, vrednotenje in ocenjevanje znanja tujega jezika v 1. in 2. triletju devetletne osnovne šole. Sintetično (numerično, točkovno) ocenjevanje in formativno opazovanje dosežkov pri pouku tujega jezika na nižji stopnji OŠ. Jezikovni portfelj.
- Delo z učbeniškimi gradivi in učna tehnologija na nižji stopnji OŠ. Kriteriji izbora gradiv za otroke.
- Nebesedna izrazna sredstva pri integriranem pouku

Content (Syllabus outline):

- Language and speech: First and foreign language acquisition, language theories and models, generally and foreign language learning at primary level; characteristics of the foreign language learner at primary level
- Language abilities, knowledge and skills, foreign language skills and comprehension abilities
- Foreign language learning at primary level: curriculum development, content, methods, techniques and strategies in the foreign language learning/teaching at primary level
- Management skills for language teachers at primary level and lesson planning
- Record keeping and assessment in the first and second cycle of the primary school. Summative (marks, points) assessment and formative assessment in the foreign language learning/teaching at primary level. Language portfolio.
- Selecting materials and using technology in the foreign language learning/teaching at primary level, criteria for the use of materials for children

- | | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"> • Medpredmetno povezovanje tujega jezika na nižji stopnji OŠ • Medkulturno in medjezikovno uzaveščanje učenja tujega jezika na nižji stopnji OŠ | <ul style="list-style-type: none"> • Non-verbal communication in the foreign language learning/teaching at primary level • Cross-Curricular understanding in the Foreign Language (Content and Language Integrated Learning) at Primary Level • Intercultural and language issues in the foreign language learning/teaching at primary level. |

|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

Cilji in kompetence:

Cilj predmeta je poglobiti in dopolniti teoretično in praktično jezikoslovno in pedagoško-psihološko-didaktično znanje o učenju in poučevanju tujega jezika na nižji stopnji OŠ ter jih ob strokovni literaturi in lastnem raziskovalnem in praktičnem delu nadgraditi oziroma izdelati lastne modele razvijanja tujejezikovnih sporazumevalnih zmožnosti učencev na nižji stopnji OŠ.

Objectives and competences:

The objective of this course is to complement and contrast contemporary theoretical and practical principles of learning/teaching of foreign languages based upon linguistic, pedagogical/educational-psychological and didactic issues for the foreign language learning/teaching at primary level; to compose and create individual models for learning/teaching of foreign languages at primary level.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent sposoben

- analizirati in pridobiti globlji vpogled v jezikoslovne, psihološke, pedagoške in didaktične pojme, ki so podlagi za kvalitetno in učinkovito poučevanje tujega jezika na nižji stopnji OŠ,
- razčleniti, primerjati in rešiti probleme povezane s teoretičnim in praktičnim pedagoškim delom učenja/poučevanja tujega jezika na nižji stopnji OŠ in jih uporabiti na drugih področjih,
- oblikovati in izdelati lastne modele učenja/poučevanja tujega jezika v otroštvu.

Intended learning outcomes:

Knowledge and understanding:

On completing of this course the student will be able to

- analyze and complement contemporary linguistic, pedagogical, psychological and didactic/educational contents which are the basis for the efficient and quality learning and teaching of foreign languages at primary level,
- distinguish, compare, contrast and solve problems related to the theoretical and practical educational/didactic issues needed for the foreign language learning/teaching at primary level and use them in other areas,
- produce, modify and create individual models in the foreign language instruction at the primary level.

Metode poučevanja in učenja:

- Interaktivno predavanje,
- seminarске vaje,
- individualne naloge,
- Študentova jezikovna mapa.

Learning and teaching methods:

- Interactive lecture,
- tutorial,
- individual assignments,
- language portfolio.

- Aktualni prispevki iz domačih in tujih strokovnih/znanstvenih revij.

Cilji in kompetence:

Cilj tega predmeta je podati študentom poglobljeno teoretično znanje o sodobnih pogledih na vzgojo/disciplino v šoli in jih usposobiti za samostojno odkrivanje in učinkovito reševanje vzgojno-disciplinske problematike.

Objectives and competences:

The objective of this course is to provide students with detailed theoretical knowledge about contemporary views on education/discipline in school and to prepare students for autonomous identification of and successfully solutions for educational-disciplinary problems.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent sposoben:

- izkazati poglobljeno znanje in razumevanje sodobnih pogledov na vzgojo/disciplino v vzgojno-izobraževalnem procesu,
- ovrednotiti in upoštevati vzgojno-teoretske pristope in teoretska načela pri oblikovanju vzgojnega koncepta,
- identificirati in učinkovito reševati vzgojno-disciplinske probleme.

Prenesljive/klijučne spretnosti in drugi atributi:

- Spretnosti komuniciranja
- Reševanje problemov

Intended learning outcomes:

Knowledge and understanding:

On completion of this course the student will be able to do the following:

- demonstrate deep knowledge and understanding of modern views on education/discipline in educational process,
- evaluate and use educational-theoretical approaches and theoretical principles in the formation of educational concept,
- identify and successfully solve educational-disciplinary problems.

Transferable/Key Skills and other attributes:

- Communication skills
- Problem solving

Metode poučevanja in učenja:

- Predavanja
- Seminar

Learning and teaching methods:

- Lectures
- Seminar

**Pogoji za vključitev v delo oz. za opravljanje
študijskih obveznosti:**

| | |
|-------------|-------|
| Ni pogojev. | None. |
|-------------|-------|

Vsebina:

- Ergonomsko – ekološke obremenitve pri pouku
- Antropometrija šolskih otrok,
- Učenčeve toplotno delovno okolje,
- Termoregulacija,
- Univerzalni toplotni indeksi, Zaščita pred toplotnimi obremenitvami,
- Učenčeve svetlobno delovno okolje
- Otroci, delo v šoli in hrup,
- Vpliv hrupa na nekatere človeške dejavnike,
- Nekateri bioenergetski dejavniki učenčevega organizma,
- Dimenzijsko načrtovanje delovnih mest pri praktičnem pouku,
- Ergonomski ocenjevalni postopki,
- Ocenjevalna analiza delovnega mesta (OADM), Merska analiza delovnega mesta (MADM)

Content (Syllabus outline):

- Ergonomics-ecological pressures at lessons,
- Antropometrics of school children,
- Children thermal environment,
- Thermoregulation,
- Universal thermal index, Protection from thermal pressures.
- Children lighting environment,
- Children, school work and noise,
- Influence of noise on some human factors,
- Bioenergetics factors of human body,
- Dimensional planning of working places at practical work in school,
- Ergonomics tehnics,
- Methods and analysis of working places.

Temeljni literatura in viri / Readings:

- Fošnarič, S., (2001). Otroci in šolsko delovno okolje. Nekateri uporabni vidiki ergonomije v vzgoji in izobraževanju. Pedagoška fakulteta. Maribor.
- Lueder, R. and Berg Rice, J.V., (2007). Ergonomics for Children: Designing Products and Places for Toddlers to Teens. Taylor & Francis; 1 edition. London.
- Savelberg, G., (2003). Development of Movement Co-ordination in Children: Applications in the Field of Ergonomics, Health Sciences and Sport. Routledge; 1 edition.
- Anshel, J., (1998). Visual ergonomics in the workplace (Guide Book Series). CRC. London
- Salvendy, G., (2006). Handbook of Human Factors and Ergonomics. Wiley; 3 edition. New York.
- Polajnar, A. in sod. (2003). Ergonomija. Fakulteta za strojništvo. Maribor

Cilji in kompetence:

Cilj predmeta je študente seznaniti s temeljnimi raziskovalnimi tehnikami ergonomskega načrtovanja in ureditve šolskega interierja in eksterierja ob upoštevanju fizioloških značilnosti otrok in mednarodnih ter domačih ergonomskih standardov.

Objectives and competences:

The objective of this course is to acquaint students with technique of ergonomics planning, and regulation of school interior and exterior, where we consider physiological aspects of children and international ergonomics standards.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent sposoben

- izkazati znanje in razumevanje ustvarjalnega procesa v fazi ergonomskega načrtovanja v šoli,
- izkazati znanje in razumevanje temeljnih raziskovalnih tehnik ergonomije v šoli,
- identificirati in rešiti lažje probleme povezane z ergonomijo šolskega eksterierja in interierja,
- pokazati sposobnost načrtovanja in organizacije raziskovanja, povezanega z antropometrijo in ergonomijo v šoli.

Prenosljive/kљučne spremnosti in drugi atributi:

- *Spretnosti komuniciranja:* ustno izražanje pri zagovoru individualnega raziskovalnega dela in pisno izražanje pri pisanju pri pisnem izpitu.
- *Uporaba informacijske tehnologije in delovnih orodij:* uporaba programskih orodij pri ergonomskem načrtovanju.
- *Reševanje problemov:* sposobnost reševanja ergonomskih problemov pri prenosu raziskovalnih izsledkov na konkretnne primere iz prakse.

Intended learning outcomes:

Knowledge and understanding:

On completion of this course the student will be able to

- demonstrate knowledge and understanding of creative process in the ergonomics planning phase,
- demonstrate knowledge and understanding of fundamental research technics of ergonomics in school,
- identify and solve problems related to ergonomics of school interior and exterior,
- show ability of planning and organize of research, closely linked with antropometry and ergonomics in school.

Transferable/Key skills and other attributes:

- *Communication skills:* oral exam at individual research work and manner of expression at examination.
- *Use of information technology and working tools:* use of simple software tools in process of ergonomics planning.
- *Problem solving:* ability to solve ergonomics problems at transfer of research findings on concreteness practical examples.

Metode poučevanja in učenja:

- predavanja,
- seminar s projektom (raziskovalna naloga),

Learning and teaching methods:

- lectures,
- seminar with project.

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

| | |
|-------------|-------|
| Ni pogojev. | None. |
|-------------|-------|

Vsebina:

- Vaje ustvarjalnosti in improvizacije na osnovni in srednji zahtevnostni stopnji z upoštevanjem sodobnih znanstvenih spoznanj.
- Vaje individualne in skupinske improvizacije upoštevajoč različne vrste improvizacije in sodobnih znanstvenih spoznanj.
- Študij odmevnih raziskav s področja glasbene ustvarjalnosti in improvizacije.
- Izvedba krajše raziskave s področja glasbene ustvarjalnosti.

Content (Syllabus outline):

- Exercises of music creativity on elementary and middle pretentiousness level with consideration of contemporary science comprehension.
- Individual and group exercises of improvisation considering different kinds of improvisation and contemporary science comprehension.
- Study of representative investigations from the field of music creativity and improvisation.
- Realisation of short research from the filed of music creativity.

Temeljni literatura in viri / Readings:

- Deliège, I. and Wiggins, A. G. (ur.) (2003). *Musical Creativity research in Theory and Practice*. Est Sussex. USA, Canada and NY: Psychology Press.
- Sloboda, J.A. (2004). *The Musical Mind. The Cognitive Psychology of Music*. New York: Oxford University Press.
- Nimczik, O., Rüdiger, W. (2003). *Instrumentales Ensemblespiel. Übungen und Improvisationen – klassische und neue Modelle*. ConBrio.
- Kihm, M.T. (2003). *Development of music creativity among elementary school students*. Journal of Research in Music Education 51 (4): 278-288.

Cilji in kompetence:

Cilj tega predmeta je poglobiti teoretično in praktično znanje o glasbeni ustvarjalnosti in improvizaciji v osnovni šoli, kot tudi usposobiti študente za izvedbo krajše raziskave s področja glasbene ustvarjalnosti.

Objectives and competences:

The objective of this course is to deepen theoretical and practical knowledge about music creativity and improvisation in elementary school, as well as qualify students for executing short musical-creativity investigations.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent sposoben

- načrtovati in voditi glasbeno ustvarjalnost v praksi in razumeti značilnosti ustvarjalnega procesa in produkta,
- razumeti glasbeno literaturo iz področja glasbene ustvarjalnosti,
- izvesti krajšo znanstveno raziskavo s področja glasbene ustvarjalnosti.

Intended learning outcomes:

Knowledge and understanding:

On completion of this course the student will be able to

- plan and realise music creativity in praxis and understand characteristics of creativity process and its product,
- understand musical literature on the music creativity field,
- realise short research work on the music creativity field.

Metode poučevanja in učenja:

- predavanja,
- glasbeno prakticiranje,
- reševanje glasbenih in raziskovalnih nalog.

Learning and teaching methods:

- lectures,
- musical practicing,
- musical problems solving and research projects.

- Jerner Martin, David.(2001). Constructing Early Childhood Science.Delmar. Kennsaw State, University. Avstralija.
- Članki iz tekoče, predvsem tuje periodike

Cilji in kompetence:

Študenti razširijo in poglobijo spoznanja o izkustvenem učenju in poučevanju in se usposobijo za njegovo raziskovanje pri pouku spoznavanja okolja in družbe.

Objectives and competences:

Students deepen and expand the knowledge of the Experiential learning and teaching. They prepare themselves for use it in to research in lessons of the Environmental Sciences and the Social Sciences.

Predvideni študijski rezultati:**Znanje in razumevanje:**

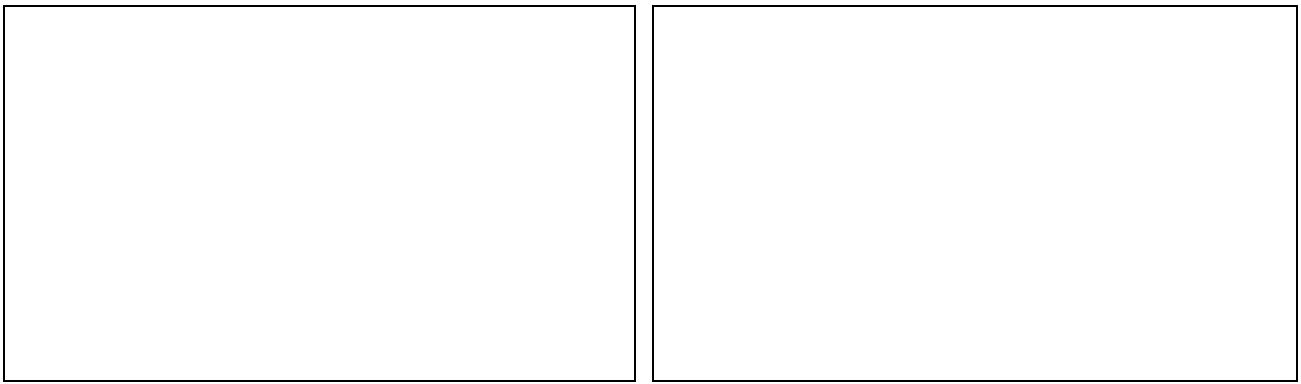

Po zaključku tega predmeta bo študent sposoben

- ovrednotiti izkustveno učenje pri pouku spoznavanje okolja in družbe s pedagoško-psihoskega vidika
- analizirati UN za spoznavanja okolja in družbe z vidika prepoznavnih elementov izkušenjskega učenja,
- vrednotiti rezultate raziskav (domačih in tujih) o izkustvenem učenju pri pouku spoznavanja okolja in družbe,
- načrtovati raziskave (kvantitativne in kvalitativne) o uporabi osrednjih in podpornih metod zkustvenega učenja pri pouku spoznavanja okolja in družbe
- razložiti povezanost izkušenjskega učenja in drugih didaktičnih strategij pri pouku SPO in DRU

Intended learning outcomes:**Knowledge and understanding:**

On completion of this course the student will be able to

- know to value the Experiential Learning in the lessons of the Environmental Sciences and the Social Sciences from the pedagogical-psychological point of view
- analysis the curriculums of subjects Environmental Sciences and Social Sciences from view of elements of Experiential Learning
- values effects of researches (domestic and abroad) about Experiential Learning in the lessons Environmental Sciences and the Social Sciences
- plans researches (quantity and qualitative) about the use of basic and supporting methods Experiential learning in the lessons of the Environmental Sciences and the Social Sciences
- explains the connection between Experiential Learning strategy and other strategy we use in the lessons of the Environmental Sciences and the Social Sciences

**Metode poučevanja in učenja:**

- interaktivno predavanje,
- metoda razgovora,
- sodelovalno učenje
- študija primera

Learning and teaching methods:

- interactiv lecture,
- the method of discourse,
- cooperative learning
- case study

Cilji in kompetence:

Cilj predmeta je študente usposobiti za znanstveno delovanje področju didaktike matematike.

Študent bo pridobil naslednje kompetence: spretnosti komuniciranja znanstvenih dosežkov, uporaba informacijske tehnologije in reševanje problemov

Objectives and competences:

The objective of this course is to prepare a student for scientific research in mathematics education.

Student will gain following competencies: ability to publish scientific results, use of ICT, solving problems.

Predvideni študijski rezultati:**Znanje in razumevanje:**

Po zaključku tega predmeta bo študent sposoben

- izkazati znanje in razumevanje didaktike matematike kot znanstvene discipline,
- pokazati sposobnost kritičnega vrednotenja metod raziskovanja,
- napisati kvaliteten znanstveni članek.

Intended learning outcomes:**Knowledge and understanding:**

On completion of this course the student will be able to

- demonstrate knowledge and understanding of mathematics education as science discipline.
- show ability of critical evaluation of methods used in research,
- write a scientific paper of relevant quality.

Metode poučevanja in učenja:

- frontalne oblike poučevanja
- konzultacije
- simulacija
- diskusija
- študija primera

Learning and teaching methods:

- frontal methos of teaching
- consultation
- simulations
- discussions
- case study

Cilji in kompetence:

Cilj predmeta je študenta:
usposobiti za prepoznavanje in spodbujanje razvoja likovne ustvarjalnosti otrok,
usposobiti za samostojno spremljanje likovne ustvarjalnosti in likovne apreciacije otrok in mladostnikov
usposobiti za kakovostno interpretacijo dobljenih znanstvenih rezultatov

Objectives and competences:

The objective of this course is to enable students:
to recognize and promote children's visual art creativity in elementary education.
qualify for independent monitoring of artistic creativity and art appreciation in children and adolescents
learn about the quality of scientific interpretation of the obtained results

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent sposoben

- razumeti problematiko likovne ustvarjalnosti pri likovni vzgoji,
- uporabiti pridobljeno znanje za razvijanje strategij spodbujanja razvoja likovne ustvarjalnosti otrok,
- izvesti krajšo raziskavo s področja likovne ustvarjalnosti in /ali likovne apreciacije

Prenosljive/ključne spremnosti in drugi atributi:

- *Spretnosti komuniciranja:* ustno izražanje pri zagovoru individualnega raziskovalnega dela
- *Uporaba informacijske tehnologiji:* uporaba programskih orodij na področju likovne ustvarjalnosti.
- *Reševanje problemov:* sposobnost načrtovanja, izvedbe in vodenja ustvarjalnega likovno pedagoškega procesa.

Intended learning outcomes:

Knowledge and understanding:

On completion of this course the student will be able to

- understand visual art creativity characteristic in art education,
- plan and realise strategies for development visual art creative process,
- realise short research work on the visual art creativity field and/ or art appreciation

Transferable/Key skills and other attributes:

- *Communication skills:* oral exam at individual research work.
- *Use of information technology:* use of software tools on the visual art field.
- *Problem solving:* ability to plan, realize and lead creative activities in art education.

Metode poučevanja in učenja:

- predavanja,
- seminar s projektom (raziskovalna naloga).

Teaching and learning methods:

- lectures,
- seminar with project.

Cilji in kompetence:

Cilj tega predmeta je nadgraditi in poglobiti, analizirati in kritično ovrednotiti sodobno teoretično in praktično znanje na področju medijev v izobraževanju.

Objectives and competences:

The objective of this course is to complement, analyze and critically evaluate contemporary theoretical and practical principles of learning/teaching through media.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent

- razumel in poznal osnove uporabe informatike, računalništva in digitalnih tehnologij v izobraževalnih procesih
- zнал organizirati izvedbo e-izobraževanja in uporabljati izobraževalne tehnologije
- zнал samostojno načrtovati, pripraviti in oblikovati elektronska učna gradiva v skladu z uveljavljenimi standardi
- zнал načrtovati iz realizirati principe kakovosti e-izobraževalnih procesov in e-učnih gradiv
- poznal specifiko vseživljenjskega e-učenja do te mere, da bo lahko aktivno sodeloval pri realizaciji le-tega

Intended learning outcomes:

Knowledge and understanding:

On the completion of this course the student will:

- understand and be acquainted with the basics of informatics, computer science and digital technologies in educational processes
- know how to organize e-learning implementation and use e-learning technologies
- be able to plan, prepare and design e-content in accordance with standards
- be able to plan and realize the principles of quality of e-learning processes and e-learning resources

| | |
|--|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|

Sagadin, J. (2003). Statistične metode za pedagoge. Maribor: Obzorja.

Cilji in kompetence:

Cilj tega predmeta je:

- usposobiti študente za uporabo eksperimentalne metode empiričnega pedagoškega raziskovanja, postopkov zbiranja in obdelave podatkov,
- usposobiti študente za sodelovanje in samostojno izvajanje enostavnejših pedagoških eksperimentov,
- pripraviti študente za pisanje raziskovalnih poročil pedagoških eksperimentov,
- pripraviti študente za publiciranje izsledkov lastnega eksperimentalnega raziskovalnega dela.

Objectives and competences:

The objective of this course is:

- to enable the students to use experimental method of empirical pedagogical research and ways of collecting and analysing the data,
- to enable the students to carry out, in a team or individually, simple pedagogical experiments,
- to prepare the students for writing research reports on pedagogical experiments,
- to prepare the students for publishing the results of their own experimental research work.

Predvideni študijski rezultati:**Znanje in razumevanje:**

Po zaključku tega predmeta bo študent

- znan in razumel pedagoški eksperiment, različne modele pedagoškega eksperimenta, pomembna etična načela izvajanja pedagoškega eksperimenta,
- sposoben uporabljati postopke zbiranja in obdelave podatkov pri pedagoškem eksperimentu, statistični programski paket SPSS,
- sposoben primerjati, povezovati in vrednotiti rezultate obdelave podatkov.

Intended learning outcomes:**Knowledge and understanding:**

On completion of this course the student will be able to

- know and understand pedagogical experiment, several models of pedagogical experiment, important ethical principles in carrying out a pedagogical experiment,
- use ways of collecting and analysing the data in a pedagogical experiment, SPSS statistical programme,
- compare, relate and evaluate results of analysing the data.

Metode poučevanja in učenja:

- predavanja,
- laboratorijske vaje

Learning and teaching methods:

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

| | |
|-------------|-------|
| Ni pogojev. | None. |
|-------------|-------|

Vsebina:

- Vzgojno-izobraževalne organizacije kot učeče se skupnosti, pomen sodelovanja
- Načrtovanje procesov in sprememb v primarnem izobraževanju
- Dejavniki učinkovitega vodenja v primarnem izobraževanju
- (Samo)evalvacija kot izhodišče za profesionalni in organizacijski razvoj

Content (Syllabus outline):

- Educational institutions as professional learning communities, importance of collaboration
- Planning processes and changes
- Factors of effective leadership
- (Self)-evaluation as a basis for professional and organisational development

Temeljni literatura in viri / Readings:

- Brundrett, M. (ur.) (2013). Principles of School Leadership. London, Thousand Oaks: Sage.
- Bush, T. in Middlewood, D. (2005). Leading and managing people in education. London, Thousand Oaks: Sage.
- Erčulj, J. (2006). Šole kot učeče se skupnosti. V: Jaklič, M. et al. Management znanja. Maribor: Pivec.
- Erčulj, J. (2011). Profesionalni razvoj kot profesionalna odgovornost. Vodenje in vzgoji in izobraževanju, 9 (2): 15-36.
- Koren, A. (2007): Ravnateljevanje: Vprašanja o vodenju šol brez enostavnih odgovorov. Koper: Fakulteta za management, Ljubljana: Šola za ravnatelje
- Brejc, M., Koren, A. in Zavašnik Arčnik, M. (ur.) (2011). Ugotavljanje in zagotavljanje kakovosti: Teorija in praksa uvajanja samoevalvacije v šole in vrtce. Kranj: Šola za ravnatelje.

Cilji in kompetence:

Cilj predmeta je, da študente in študentke razširijo in poglobijo znanje o vodenju in organizaciji v primarnem izobraževanju, da razvijejo kritični odnos do procesov organizacije in vodenja v primarnem izobraževanju ter da razširijo in poglobijo znanje o raziskovanju organizacije in vodenja v primarnem izobraževanju.

Objectives and competences:

The objective of this course is to expand and deepen students knowledge about leadership and organisation , to develop critical attitude towards organisational and leadership processes and to expand and deeper theri knowledge about research of organisation and leadership.

Predvideni študijski rezultati:**Znanje in razumevanje:**

Po zaključku tega predmeta bo študent sposoben izkazati

- poglobljeno znanje in razumevanje procesov organizacije in vodenja v primarnem izobraževanju;
- poglobljeno poznavanje koncepta šole kot učeče se skupnosti;
- poglobljeno poznavanje načrtovanja procesov in sprememb v primarnem izobraževanju;
- poglobljeno razumevanje pomena (samo)evalvacije;
- poglobljeno razumevanje povezovanja profesionalnega razvoja posameznika in organizacijskega razvoja.

Intended learning outcomes:**Knowledge and understanding:**

On completion of this course the student will be able to demonstrate

- deep knowledge and understanding of organisational and leadership processes ;
- deep knowledge about the concept of schools as professional learning communities;
- deep knowledge of planning processes and changes ;
- deep understanding of (self)evaluation;
- deep understanding of relationship between individual professional development and organisational development.

Metode poučevanja in učenja:

- Predavanja
- Delo v skupinah
- Vodene razprave
- Obravnavna študij primerov
- Delo z besedilom
- Predstavitev
- Multimedija predstavitev

Learning and teaching methods:

- Interactive lectures
- Group work
- Guided discussions
- Case studies
- Working with texts
- Presentations
- Multimedia presentation

Cilji in kompetence:

Cilj predmeta je študente uvesti v raziskovanje na področju didaktike branja ter usvojiti znanja o sodobnih didaktičnih pristopih poučevanja in preučevanja didaktike usvajanja bralnih strategij

Objectives and competences:

The aim of the subject is to teach students how to research on the field of L1 (mother tongue) reading and to get acquainted with the knowledge of current methods of teaching and researching of reading strategies.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent sposoben

Intended learning outcomes:

Knowledge and understanding:

On completion of this course the student will be able to

- izkazati razumevanje težjih problemov na področju poučevanja branja ter razvijanja bralnih strategij,
- izkazati znanje in razumevanje, kdaj uporabiti posamezne znanstvene metode za reševanje težjih problemov na področju branja in razvijanja bralnih strategij.
- Znal bo načrtovati eksperiment, v katerem bo preveril uspešnost posamezne znanstvene metode za reševanje težjih problemov na področju branja in razvijanja bralnih strategij.
- Znal bo uporabiti kvalitativne in kvantitativne metode preučevanja uspešnosti metod v didaktiki osvajanja bralnih strategij.
- Znal bo načrtovati in evalvirati implementacijo novih didaktičnih metod.

Prenosljive/ključne spremnosti in drugi atributi:

- *Spretnosti komuniciranja:* ustno izražanje pri zagovoru raziskovalnega seminarja. Pisno izražanje pri pisanju raziskave.
- *Uporaba informacijske tehnologije.*

Reševanje problemov: sposobnost reševanja težjih problemov pri vrednotenju uspešnosti bralnega in literarnega pouka ter pri iskanju sodobnih raziskovalno - didaktičnih pristopov na področju učenja z branjem.

- show the understanding of complicated problems on the field of teaching reading and developing reading strategies,
- show the knowledge, when to use particular scientific methods for solving complicated problems on the field of teaching reading and developing reading strategies.
- He will be able to plan the experiment, in which he will check particular scientific methods for solving complicated problems on the field of teaching reading and developing the reading strategies.
- He will be able to use qualitative and quantitative methods for checking methods, used in reading didactics.
- He will be able to plan and evaluate the implementation of new didactics methods.

Transferable/Key skills and other attributes:

- *Communication skills:* oral communication at the defense of research seminar. Scientific writing communication skills at writing of research report
- *Use of ICT.*
- *Solving problems:* the ability of solving complicated problems on the field of teaching reading and of the field of learning through reading.

Metode poučevanja in učenja:

- predavanja,
- seminar s projektom (raziskovalna naloga),

Learning and teaching methods:

- lectures,
- seminar with research project.

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

| | |
|-------------|-------|
| Ni pogojev. | None. |
|-------------|-------|

Vsebina:

- Pravna ureditev šolstva v Republiki Sloveniji.
- Razmerje otrok-starši-šola-država.
- Cilj izobraževanja in vzgoje v vlogi temeljnih osebnosti pravic.
- Ustavno pravni, civilnopravni, upravnopravni in kazenskopravni vidiki šolstva.
- Pravica do izobrazbe.
- Pravica otroka do izobraževanja o spoznavanju samega sebe in soljudi
- Pravica do telesne nedotakljivosti otroka v šoli.
- Pravica do zasebnosti.
- Pravica do družinskega življenja učencev in njihovih staršev.
- Posebej o civilnopravnih vidikih šolstva.
- Odškodninska odgovornosti šole in učiteljev.
- Izobraževanje otrok s posebnimi potrebami.

Content (Syllabus outline):

- Legislation on education in the Republic of Slovenia
- Relation between child, parents and state
- Goal of education and up-bringing in the role of fundamental human rights
- Constitutional, civil, administrative and penal law aspects of education
- Right to education
- Child's right to education about self-recognition and cognition of other people
- Right to physical integrity of the child in school
- Right to privacy
- Right to family life of pupils and their parents
- Special matters on civil law aspects of education
- School's and teachers' liability for damages
- Education of children with special needs

Temeljni literatura in viri / Readings:

- Zakon o organizaciji in financiranju vzgoje in izobraževanja (ZOFVI), Uradni list RS, št. 12-567/1996 in kasnejše spremembe.
- Konvencija o otrokovičih pravicah.
- Zakon o osnovni šoli.
- Novak B. (2004). Šola in otrokove pravice. Ljubljana:Cankarjeva založba.
- Zgonc B. (1992): Pravice otrok v izobraževanju v : več avtorjev (Šelih A., ur.): Pravni vidiki otrokovičih pravic. Ljubljana: Časopisni zavod Uradni list Republike Slovenije
- Heckel H., Hermann A. (2000).Schulrechtskunde. Neuwied und Darmstadt: LuchterhandVerlag.
- Vsi pomembnejši pravni predpisi s področja izobraževanja in šolstva.
- Članki iz tekoče, domače in tujne periodike

Cilji in kompetence:

Cilj predmeta je, da študentje pridobijo znanje o pravnih predpisih na področju vzgoje in izobraževanje in razširijo svoje pravno znanje o pravicah, dolžnostih in odgovornosti otrok, staršev in učiteljev in da učiteljski poklic podredijo določbam različnih pravnih vej ter spoznajo prepletanje le-teh.

Objectives and competences:

The goal of the subject is to provide students with knowledge on provisions in the field of up-bringing and education and widen their legal knowledge on rights, duties and liabilities of children, parents and teachers and that the profession of a teacher is subject to provisions of different legal fields and they get acquainted with the interferences of these.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku predmeta bo študent sposoben

- izkazati znanje in razumevanje pravnih predpisov na področju vzgoje in izobraževanja,
- identificirati in rešiti lažje pravne probleme šolstvu.

Intended learning outcomes:

Knowledge and understanding:

After the conclusion of the subject the student will be capable

- to show knowledge and understanding of legal provisions in the field of up-bringing and education,
- to identify and resolve simple legal problems of schools.

Metode poučevanja in učenja:

- predavanja,
- razgovor,
- obravnavana praktičnih pravnih primerov
- seminar

Learning and teaching methods:

- lectures
- conversations
- handling of case studies
- seminar

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

| | |
|-------------|-------|
| Ni pogojev. | None. |
|-------------|-------|

Vsebina:

- Pregled nebesnih objektov in pojavov (Luna, planeti, kometi, asteroidi, meteorji, meteorski roji, meteoriti, Sonce, življenje zvezd, naša galaksija, galaksije v vesolju, vesolje kot celota, veliki pok, ...).
- Zgodovinski pregled astronomije in astronautike (kako so prvič izmerili polmer Zemlje, kako so določili razdaljo Zemlja – Sonce, prvi poleti v vesolje, prvi umetni sateliti, ...)
- Pogoji opazovanja, glavne karakteristike teleskopov, opazovanje s priročnimi optičnimi pripomočki, opazovanje objektov skozi teleskop, največji observatoriji na svetu, teleskopi prihodnosti).
- Priprave na opazovanje: zvezdna karta, računalniški programi in internet (prednosti računalniških programov pred zvezdnimi kartami, računalniški programi Skymap, Starry Night, Moon Atlas, zanimivi internetni naslovi).

Content (Syllabus outline):

- Overview of objects in the sky, processes and phenomena (Moon, planets, comets, asteroids, meteors, meteorites, Sun, life of stars, our galaxy, galaxies in universe, universe in general, Big Bang, ...).
- Historical overview of astronomy and astronautics (how the radius of Earth was first measured, how the distance Earth – Sun was determined, first missions in universe, first artificial satellites, ...)
- Astronomical observations (conditions for observation, main characteristics of telescopes, observation with every-day optical devices, observation with telescopes, the biggest telescopes in the world, telescopes of the future).
- Preparations for observations: sky maps, computer programmes and internet (advantages of computer programmes in comparison to sky maps, computer programmes: Skymap, Starry Night, Moon Atlas, selected www-pages).

- Delo v razredu: didaktične igre (vrtenje Zemlje okoli svoje osi, kroženje Zemlje okoli Sonca; Sonce, Zemlja, Luna; planeti, zvezde).

- Work in class: instructional games (rotation of the Earth, revolution of the Earth round the Sun; Sun, Earth, Moon; planets, stars).

- Grubelnik V., Repnik R. Priprava učitelja na pouk astronomije v osnovni šoli: delovni učbenik za strokovno izpopolnjevanje učiteljev. FNM, Maribor 2009.

Cilji in kompetence:

Cilji:

- ustvariti pregled osnovnih nebesnih objektov in pojavov.
- pridobivanje praktičnih izkušenj pri opazovanju nebesnih teles in pojavov.
- priprava na samostojno izvajanje astronomskih opazovanj v šoli.
- naučiti se uporabljati zvezdno karto, računalniške programe in uporabiti internet.
- priprava na delo v razredu (eksperimenti, didaktične igre, ...)

Kompetence:

- Sposobnost orientacije na nočnem nebu prepoznavanja objektov na nočnem nebu (zvezde, planeti, ozvezdja, ...)
- Sposobnost organizacije dnevnih in nočnih astronomskih opazovanj za otroke.
- Sposobnost uporabe informacijsko komunikacijske tehnologije pri pouku.
- Sposobnost jasnega pisnega in ustnega izražanja.
- Sposobnost prenosa pridobljenih znanj s področja astronomije na druga področja.
- Skozi praktično eksperimentalno delo in delo na terenu usvojiti ključne naravoslovne postopke ter si pridobiti praktične izkušnje opazovanja.
- Prenos uporabe univerzalnih metod raziskovalnega in praktičnega dela s primerov iz študija na primere šolske prakse in vsakdanjega življenja.

Objectives and competences:

Objectives:

- giving an overview of basic objects in the sky, processes and phenomena.
- to gain practical experience by observing objects in the sky and phenomena.
- preparation for self-supporting realization of astronomical observation in school.
- using sky maps, computer programmes and be able to find appropriate information on the internet.
- preparations for working in school (experiments, instructional games, ...)

Competences:

- Ability of orientation and recognising objects in the night sky (stars, planets, basic constellations, ...)
- Ability to organise day and night astronomical observations for pupils
- Ability to use information and communication technologies in teaching process.
- Ability to provide clear written and oral expression.
- Ability of knowledge transfer from astronomy to other fields.
- By practical experimental and field work gain knowledge about crucial scientific approaches in science and develop skills for observing.
- Transfer of universal scientific methods used during the study to examples in school praxis and problems in everyday life.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent:

- poznal osnovne nebesne objekte in pojave.
- pridobil praktične izkušnje za opazovanje nebesnih teles in pojavov ter se usposobiti za samostojno izvajanje preprostih astronomskih opazovanj v šoli.
- zнал orientirati se na nočnem nebu.
- zнал uporabiti zvezdno karto ter si pomagati z računalniškimi programi in internetom.

Intended learning outcomes:

Knowledge and understanding:

On completion of this course the student will:

- Recognise basic objects in the sky and phenomena.
- Develop practical skills for observing objects in the sky and be able to carry out astronomical observation in school.
- be able to orient according to objects in the sky.

Cilji in kompetence:

Cilj tega predmeta je usposobiti za samostojno načrtovanje in izvajanje glasbeno-pedagoških raziskav.

Objectives and competences:

The objective of this course is to give knowledge for independent planning and realisation of music-pedagogic research.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent usposobljen za

- načrtovanje in uresničitev zahtevne glasbeno-pedagoške raziskave,
- kritično presojo rezultatov in prenos rezultatov v glasbeno pedagoško prakso,
- objavljanje svojih del v znanstvenih revijah.

Intended learning outcomes:

Knowledge and understanding:

On completion of this course the student will be able to

- plan and realise pretending music- pedagogical research,
- make critical view about results and their transmission to music-pedagogical praxis,
- publication of articles in scientific journals.

Metode poučevanja in učenja:

- predavanja z aktivno udeležbo študentov (razлага, diskusija, vprašanja, primeri).
- Izdelava vaj z glasbeno tematiko in seminariske naloge.

Learning and teaching methods:

- Lectures with student's active engagement (explanation, discussion, questions, problems solving).
- Execution of exercises and seminar work on music topic.

Cilji in kompetence:

Cilj tega predmeta je študente usposobiti za samostojno likovno pedagoško raziskovanje, ter uporaba kvantitativne in kvalitativne paradigm empiričnega pedagoškega raziskovanja.

Objectives and competences:

The objective of this course is to enable students for independent visual art education research and the use of quantitative and qualitative paradigm of empirical pedagogical research.

Predvideni študijski rezultati:Znanje in razumevanje:

Po zaključku tega predmeta bo študent sposoben:

- načrtovati in izvesti likovno pedagoško raziskavo,
- kritično presojati izsledke likovno pedagoške raziskave,
- prenesti izsledke likovno pedagoške raziskave v praksu,
- oblikovati pisno poročilo in ga objaviti v znanstveni reviji.

Prenosljive/ključne spremnosti in drugi atributi:

- Spremnosti komuniciranja: ustno izražanje pri zagovoru raziskovalnega seminarja. Pisno izražanje pri pisanju raziskave in pisnem izpitu.
- Uporaba informacijske tehnologije: uporaba programskega orodja pri likovno pedagoškem raziskovanju.
- Reševanje problemov: sposobnost načrtovanja in izvedbe likovno pedagoške raziskave.

Intended learning outcomes:Knowledge and understanding:

On completion of this course the student will be able to

- plan and realise visual art pedagogical research,
- make critical view about research results ,
- transmission of results to visual art-pedagogical praxis,
- Writing and publishing research article in scientific journal.

Transferable/Key skills and other attributes:

- Communication skills: oral exam at research seminar work, manner of expression at written research work and by examination.
- Use of information technology: use of software tools on the visual art field.
- Problem solving: ability to plan and realize visual art pedagogical research.

Metode poučevanja in učenja:

- predavanja,
- seminar s projektom (raziskovalna naloga),

Learning and teaching methods:

Cilji in kompetence:

Cilj predmeta je študente poglobiti znanja s področja didaktike matematike in jih usposobiti za znanstveno delovanje na tem področju.
Študent bo pridobil naslednje kompetence: spretnosti komuniciranja znanstvenih dosežkov, uporaba informacijske tehnologije in reševanje problemov

Objectives and competences:

The objective of this course is to deepen students' knowledge about specifics of mathematics education as science discipline and to prepare them for scientific research in that domain.
Student will gain following competencies: ability to publish scientific results, use of ICT, solving problems.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent sposoben

- izkazati znanje in razumevanje didaktike matematike kot znanstvene discipline,
- pokazati sposobnost kritičnega vrednotenja metod raziskovanja,
- pokazati sposobnost raziskovanja relevantnih problemov didaktike matematike.

Intended learning outcomes:

Knowledge and understanding:

On completion of this course the student will be able to

- demonstrate knowledge and understanding of mathematics education as science discipline.
- show ability of critical evaluation of methods used in research,
- show ability to research some relevant problem in mathematics education.

Metode poučevanja in učenja:

- frontalne oblike poučevanja
- konzultacije
- simulacija
- diskusija
- študija primera

Cilji in kompetence:

Cilj predmeta je študente seznaniti z raziskovanjem na področju didaktike naravoslovja in tehnike ter usvojiti znanja o sodobnih didaktičnih pristopih poučevanja naravoslovja in tehnike.

Objectives and competences:

The objective of this course is to acquaint students with research on the field of didactics of science and technics and assimilate knowledge about contemporary didactics elements of science and technics teaching.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent sposoben

- izkazati znanje in razumevanje težjih problemov v fazi poučevanja naravoslovja in tehnike,
- izkazati znanje in razumevanje kdaj uporabiti posamezne znanstvene metode ter specifične naravoslovno-tehnične postopke,
- identificirati in rešiti težje probleme povezane z poučevanjem naravoslovja in tehnike in jih uporabiti na drugih področjih,
- pokazati sposobnost samostojnega načrtovanja in organizacije različnih raziskovalnih strategij pouka ročnih spremnosti in razume principe dela z uporabo informacijsko komunikacijske tehnologije.

Prenosljive/ključne spremnosti in drugi atributi:

- *Spremnosti komuniciranja:* ustno izražanje pri zagovoru raziskovalnega seminarja. Pisno izražanje pri pisaniu raziskave in pisnem izpitu.
- *Uporaba informacijske tehnologije in delovnih orodij:* uporaba programskih orodij in drugih delovnih orodij pri naravoslovju in tehniki.
- *Reševanje problemov:* sposobnost reševanja težjih problemov pri vrednotenju praktičnega dela učencev ter pri iskanju sodobnih raziskovalno - didaktičnih pristopov.

Intended learning outcomes:

Knowledge and understanding:

On completion of this course the student will be able to

- demonstrate knowledge and understanding of difficult problems in the phase of Science and Technics teaching,
- demonstrate knowledge and understanding when we can use some research methods and specific science-technics proceedings,
- identify and solve difficult problems related to Science and Technics evaluation and use them in other areas,
- show ability of independence research and organize a different research strategys of Crafts and understanding principles of work with general application of information-communication technology.

Transferable/Key skills and other attributes:

- *Communication skills:* oral exam at research seminar work, manner of expression at written research work and examination.
- *Use of information technology and working tools:* use of software and other working tools in Science and Technology.
- *Problem solving:* ability to solve difficult problems at evaluation of practical pupils work, at process articulation and in investigation of contemporary research and didactics accession of science and technics.

Metode poučevanja in učenja:

- predavanja,
- seminar s projektom (raziskovalna naloga).

Learning and teaching methods:

- lectures,
- seminar with research project.

Cilji in kompetence:

Cilj predmeta je študente seznaniti z raziskovanjem na področju didaktike slovenščine ter usvojiti znanja o sodobnih didaktičnih pristopih poučevanja in preučevanja branja in recepcije literature.

Objectives and competences:

The aim of the subject is to teach students how to research on the field of L1 (mother tongue) didactics and to get acquainted with the knowledge of current methods of teaching and researching of reading literature.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent sposoben

- izkazati razumevanje težjih problemov na področju poučevanja branja in razvijanja recepcijske zmožnosti,
- izkazati znanje in razumevanje, kdaj uporabiti posamezne znanstvene metode za reševanje težjih problemov na področju branja in razvijanja recepcijske zmožnosti.
- Znal bo načrtovati eksperiment, v katerem bo preveril uspešnost posamezne znanstvene metode za reševanje težjih

Intended learning outcomes:

Knowledge and understanding:

On completion of this course the student will be able to

- show the understanding of complicated problems on the field of teaching reading and developing the reception of literature,
- show the knowledge, when to use particular scientific methods for solving complicated problems on the field of teaching reading and developing the reception of literature.
- He will be able to plan the experiment, in which he will check particular scientific methods for solving complicated problems

| | |
|------------|------|
| Ni pogojev | None |
|------------|------|

Vsebina:

- Analiza kurikulov za predmeta spoznavanje okolje in družba (strategije načrtovanja, teorije učenja in poučevanja, elementi kurikula...)
- Načrtovanje pouka spoznavanje okolja in družbe (učiteljeva letna, tedenska in dnevna priprava)
- Izvajanje pouka spoznavanje okolja in družbe (notranja in zunanjega organizacija pouka)
- Vrednotenje pouka spoznavanje okolja in družbe (vrste, oblike in metode preverjanja in ocenjevanja)

Content (Syllabus outline):

- Analysis of curricula of subjects Environmental Sciences and Social Sciences (strategy planning, theories of learning and lesson, elements of curriculum...)
- Planning of educational process of subjects Environmental Sciences and Social Sciences (teacher's annual, weekly, daily lesson plan)
- Carrying out a lesson of subjects Environmental Sciences and Social Sciences (internally and externally organization of lesson)
- Estimation a lesson of subjects Environmental Sciences and Social Sciences (ways, forms and methods of knowledge examining and grading).

- Raziskovanje pri didaktiki spoznavanje okolja in družbe.

- Research in Didactics of Environmental Sciences and Social Sciences

Temeljni literatura in viri / Readings:

Szymanski Sunal, C., Haas, M., E. (2010). Social Studies for the Elementary and Middle Grades: A Constructivist Approach (4rd Edition), USA, Allyn & Bacon.

Ellis, A. (2006).Teaching and Learning Elementary Social Studies (8th Edition). USA, Allyn & Bacon.

Fields,M.V.,Fields, M.D. (2005). Constructive Guidance and Discipline. Fourth edition. USA, Pearson.

Članki iz tekoče, predvsem tuje periodike

Cilji in kompetence:

Študenti razširijo in poglobijo spoznanja iz didaktike spoznavanja okolja in družbe ter se usposobijo za raziskovanje na tem področju.

Objectives and competences:

Students deepen and expand the knowledge of Didactics of Environmental Sciences and Social Sciences and qualify themselves for scientific research in that domain.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent sposoben

- vrednotiti kurikula za spoznavanje okolje in družbe z različnih vidikov in ju primerjati s podobnimi v tujini,
- vrednotiti temeljne sestavine pouka spoznavanje okolja in družbe (načrtovanje, izvajanje in vrednotenje),
- utemeljiti uporabo kvantitativnih in kvalitativnih raziskav pri didaktiki spoznavanje okolja in družbe ter jih izvajati.

Intended learning outcomes:

Knowledge and understanding:

On completion of this course the student will be able to

- value curricula of subjects Environmental Sciences and Social Sciences from different point of view and compare them with similar curricula in other countries,
- value basic elements of lesson Environmental Sciences and Social Sciences (planning, carrying out and evaluation),
- establish use of quantitative and qualitative researches in the Didactic Environmental Sciences and Social Sciences and also carry out them

Metode poučevanja in učenja:

študijskih obveznosti:

| | |
|-------------|-------|
| Ni pogojev. | None. |
|-------------|-------|

Vsebina:

- Raziskovanje na področju didaktike športa
- analiza pomembnejših raziskav v Sloveniji in tujini na področju didaktike športa
 - raziskovanje didaktičnih problemov v športu
 - sodobni trendi raziskovanja na področju didaktike športa
- Raziskovanje na področju motoričnega učenja
- analiza pomembnejših raziskav
 - raziskovanje na področju motoričnega učenja
 - kvalitativne in kvantitativne meritve izvedbe gibanja
- Aplikacija znanstvenih spoznanj v prakso.

Content (Syllabus outline):

- Research on Sport Didactics
- Analysis of most important Slovenian and International Researches in Sport Didactics
 - Research on didactic problems in sport
 - Contemporary trends in sport didactics research
- Research on Motor Learning domains
- Analysis of most important research work
 - Research on the field of motor learning
 - Qualitative and quantitative measurements of motor performance
- Application of scientific results into practice
- Project research work in sport didactics

Projektno raziskovalno delo pri didaktiki športa.
Informacijsko komunikacijska tehnologija pri športni vadbi.

Information communication technology in sport exercise.

Temeljni literatura in viri / Readings:

- Bala, G. (2010). Metodologija kineziometrijskih istraživanja. Novi Sad: Fakultet sporta i fizičkog vaspitanja.
- Hoffman, S.J. (2013). Introduction to kinesiology. Champaign: Human Kinetics.
- Pišot, R., Planinšec, J. (2005). Struktura motorike v zgodnjem otroštvu. Koper: Založba Annales.
- Škof, B. (2007). Šport po meri otrok in mladostnikov: pedagoško-psihološki in biološki vidiki kondicijske vadbe mladih. Ljubljana: Fakulteta za šport.
- Thomas, J.R., Nelson, J.K., Silverman, S.J. (2005). Research methods in physical activity. Champaign: Human Kinetics.

Cilji in kompetence:

Cilj predmeta je, da si študent pridobi znanje o raziskovanju na področju didaktike športa in da zna spoznanja uporabiti v praksi.

Objectives and competences:

The objective of this course is to give students knowledge of research work on the field of sport didactics and to apply research results in practice.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent sposoben:

- izkazati znanje pri proučevanju didaktike športa in motoričnem učenju
- načrtovati raziskave na področju didaktike športa
- izbrati in uporabiti ustrezne raziskovalne metode uporabiti pridobljeno znanje v praksi

Prenosljive spremnosti in drugi atributi:

- *Spretnosti komuniciranja*: ustno izražanje pri zagovoru seminarja in pri ustnem izpitu
- *Uporaba informacijske tehnologije*: uporaba programskih orodij pri raziskovanju
- *Reševanje problemov*: sposobnost reševanja problemov pri raziskovanju ter pri uporabi znanstvenih spoznanj iz športa v različnih okoliščinah
- *Timsko delo*: sodelovanje pri delu v skupinah

Intended learning outcomes:

Knowledge and understanding:

On completion of this course the student will be able to:

- Demonstrate knowledge of sport didactics research and motor learning
 - Design research work in the field of sport didactics
 - Select and use of adequate research methods
 - Use of acquainted knowledge in the practice
- Transferable Skills and other attributes
- *Communication skills*: oral expression skills for seminar, manner of expression at oral examination.
 - *Use of information technology*: use of software tools in research
 - *Problem solving*: ability to solve problems in research work and at the application of scientific sport knowledge in various contexts
 - *Team work*: work cooperation in groups

- Hood, P., Tobutt, K. (2009). Modern Languages in the Primary School. London: SAGE Publications Ltd.
- Aktualni znanstveni članki in literatura.

Cilji in kompetence:

Cilj predmeta je poglobiti, dopolniti, analizirati in kritično ovrednotiti sodobna teoretična in praktična jezikoslovna in pedagoško-psihološko-didaktična izhodišča potrebna za poučevanje tujega jezika na nižji stopnji OŠ ter jih ob strokovni literaturi in lastnem raziskovalnem in praktičnem delu nadgraditi z modeli razvijanja tujejezikovnih sporazumevalnih zmožnosti učencev na nižji stopnji OŠ ter pripraviti konkretno didaktične izpeljave posameznih vsebin.

Objectives and competences:

The objective of this course is to complement, analyze and critically evaluate contemporary theoretical and practical principles of learning/teaching of foreign languages based upon linguistic, pedagogical/educational-psychological and didactic issues for the foreign language learning/teaching at primary level; to compare, investigate and produce research and practical models for learning/teaching of foreign languages at primary level.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent sposoben

- analizirati, kritično vrednotiti in pridobiti globlji vpogled v jezikoslovne, psihološke, pedagoške in didaktične pojme, ki so podlaga za kvalitetno in učinkovito poučevanje tujega jezika na nižji stopnji OŠ,
- razčleniti, primerjati in rešiti probleme povezane s teoretičnim in praktičnim raziskovalnim pedagoškim delom učenja/poučevanja tujega jezika na nižji stopnji OŠ in jih uporabiti na drugih področjih,
- oblikovati in izdelati lastne modele učenja/poučevanja tujega jezika v otroštvu.

Intended learning outcomes:

Knowledge and understanding:

On completing of this course the student will be able to

- analyze, critically evaluate and complement contemporary linguistic, pedagogical, psychological and didactic/educational contents which are the basis for the efficient and quality learning and teaching of foreign languages at primary level,
- distinguish, compare, contrast and solve problems related to the theoretical and practical educational/didactic issues needed for the foreign language learning/teaching at primary level and use them in other areas,
- produce, modify and create individual models in the foreign language instruction at the primary level.

Metode poučevanja in učenja:

- Interaktivno predavanje,
- seminarske vaje,
- individualne (raziskovalne) naloge,
- študentova jezikovna mapa.

Learning and teaching methods:

- Interactive lecture,
- tutorial,
- individual (research) assignments,
- language portfolio.

- članki iz tekoče, predvsem tuje periodike

Cilji in kompetence:

Cilj predmeta je, da študent in študentke razširijo svoje znanje o temeljnih dejavnikih, zakonitostih in značilnostih razvoja od spočetja do smrti ter poglobijo svoje znanje o pojavnih oblikah, vzrokih nastanka in pomenu individualnih razlik v psihičnem razvoju. Razširijo svoje znanje o razvoju navezanosti in samopodobe v srednjem otroštvu in o značilnostih razvoja v fazi prehoda v odraslost.

Objectives and competences:

- The objective of this course is that students expand their knowledge about factors, laws and characteristics of human development from conception to death and to expand their knowledge about the nature, reasons for appearance, and the importance of individual differences in psychic development. They expand their knowledge about development of attachment and self-perception in middle childhood and the characteristics of emerging adulthood developmental period.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku predmeta bo študent

- sposoben izkazati poglobljeno poznavanje in razumevanje predmeta razvojna psihologija, dejavnikov, teorij in značilnosti psihičnega razvoja od spočetja do smrti,
- sposoben kritične uporabe znanstvenih in strokovnih spoznanj iz psihologije,
- sposoben samostojnega raziskovanja,
- Sposoben jasnega pisnega in ustnega izražanja.

Intended learning outcomes:

Knowledge and understanding:

On completion of this course the student

- will be able to demonstrate familiarity with and understanding of the subject of developmental psychology, factors, theories, and characteristics of psychic development from conception to death,
- will be able to critically use and apply scientific and professional findings of developmental psychology,
- will be able of independent research,
- will be able of clear writing and orally expression.

Metode poučevanja in učenja:

- interaktivno predavanje,
- razgovor,
- obravnavo študijskih primerov,
- delo z besedilom,
- multimedija predstavitev.

Learning and teaching methods:

- interactive lectures,
- discussion,
- case studies discussion,
- working with texts,
- multimedia presentation.

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

| | |
|-------------|-------|
| Ni pogojev. | None. |
|-------------|-------|

Vsebina:

- Sistemi in sistemsko mišljenje: univerzalni pogled na sisteme v naravi, tehniki in družbi: struktura, dinamika in razvoj sistemov.
- Uvajanje sistemov v izobraževanju: razgradnja kompleksnega sistema - prepoznavanje delov sistema, določitev povezav med deli sistema, medsebojnih vplivov in zunanjih vplivov na sistem.
- Sistemska dinamika: kvalitativni opis dinamike sistemov, kavzalni diagrami in diagrami stanj in tokov.
- Sistemska dinamika: kvantitativna analiza dinamike sistemov, določanje spremenljivk v sistemu, ki opisujejo stanja in tokove. Medsebojni vplivi in zunanji vplivi na posamezne spremenljivke.
- Aplikacije v šolski praksi: analiza primernih vsebin iz učnega načrta za razvijanje sistemskega mišljenja pri učencih; primeri modelnih pristopov v slovenskih in tujih učnih načrtih.

Content (Syllabus outline):

- Systems and System Thinking: universal view on natural, technical, and social systems: structure, dynamics, evolution.
- Introduction of systems in education: decomposition of a complex system – recognising its parts, determination of interrelations between system parts, internal and external influences.
- Systems Dynamics: qualitative description of systems dynamics, causal and stock-flow diagrams.
- Systems Dynamics: quantitative analysis of systems dynamics, determination of systems variables, determining stocks and flows. Internal and external influences on particular variables.
- Applications in school praxis: analysis of contents in curriculum appropriate for developing of system thinking in school; examples of modelling approaches in Slovenian and some foreign curricula.

- Uporaba računalniških programov za modeliranje sistemski dinamike v šoli: grafično orientirani programi DynaSys, Stella, Madonna, ...

- Using of computer programs developed for modelling of systems dynamics in school: graphic-oriented programs DynaSys, Stella, Madonna, ...

Temeljni literatura in viri / Readings:

- G. Ossimitz, Entwicklung systemischen Denkens, Theoretische Konzepte und empirische Untersuchungen, Profil Verlag, München 2000.
- P.M. Senge, N. Cambron-McCabe, T. Lucas, B. Smith, J. Dutton, A. Kleiner, Schools that Learn: A Fifth Discipline Fieldbook for Educators, Parents, and Everyone Who Cares About Education. Doubleday, New York 2000.

- Bejan, J.P. Zane, Design in Nature: How the Constructal Law Governs Evolution in Biology, Physics, Technology, and Social Organization, Doubleday, New York, 2012.
- P. Ball, Criticall mass; How one thing leads to another, Random House, London, 2004.
- Slovenski in tuji učni načrti (npr. Rahmenplan Grundschule, MBFJ, Mainz, 2002; Core Curriculum, Elementary Science, The State Education Department, New York).
- Strokovni in znanstveni članki v revijah / Articles published in professional and scientific journals.

Cilji in kompetence:

Cilji:

- spoznati svetovne raziskovalne tendre na področju izobraževanja, ki so vezani na sistemski pristop.
- poudariti univerzalnost analize sistemov v naravi, tehniki in družbi; analiza strukture, dinamike in razvoja sistemov.
- na primerih šolske prakse ponazoriti zvezo med strukturo, dinamiko in evolucijo kompleksnih sistemov.
- povezati sistemsko mišljenje z modeliranjem sistemski dinamike in eksperimentom.
- kvalitativna in kvantitativna analiza dinamike kompleksnih sistemov.
- prenos uporabe univerzalnih metod analize s primerov iz študija na primere v šolski praksi in vsakdanjem življenju.

Kompetence:

- Sposobnost samostojnega sledenja najnovejšim znanstvenim trendom na področju izobraževanja s sistemskimi pristopi.
- Sposobnost prenosa najnovejših znanstvenih odkritij na področju sistemskih teorij na področje izobraževanja.
- Sposobnost prepoznavanja in obravnave sistemov, ki se obravnavajo v šoli.
- Sposobnost poglobljene obravnave šolskih sistemov.
- Sposobnost analize strukture, dinamike in evolucije sistemov v naravi, tehniki in družbi.
- Sposobnost sistemskega mišljenja.
- Sposobnost osnovne kvalitativne in kvantitativne analize dinamike sistemov.
- Sposobnost uporabe informacijsko komunikacijske tehnologije pri pouku.
- Sposobnost jasnega pisnega in ustnega izražanja.

Objectives and competences:

Objectives:

- overview of world research trends in the field of systems-oriented education.
- emphasising the universality of analysing the natural, technical and social systems; analysis of system structure, dynamics and its evolution.
- presenting the relationship between the structure, dynamics, and evolution of complex systems, on the basis of examples in school praxis
- establishing the relationship between system thinking, modelling and the experiment.
- qualitative and quantitative analysis of system dynamics.
- transfer of using general methods for the analysis of studied systems to other fields, in particular, school praxis and everyday life.

Competences:

- Ability to recognise relevance of current research trends in the field of systems-oriented education, and be able to follow them.
- Ability to transfer the ideas from new scientific trends in systems theory into the school practice.
- Ability to recognise and deal with systems that are part of school curricula.
- Ability for more comprehensive dealing with school systems.
- Ability to analyse structure, dynamics, and evolution of natural, technical, and social systems.
- Ability of system thinking.
- Ability of basic qualitative and quantitative analysis of systems dynamics.
- Ability to use information and communication technologies in teaching process.
- Ability to provide clear written and oral expression.

- Sposobnost prenosa pridobljenih znanj s področja dinamičnih sistemov na druga področja.

- Ability of knowledge transfer from system dynamics to other fields.

Predvideni študijski rezultati:

Znanje in razumevanje:

- Študent zna poiskati ključno literaturo in druge vire na znanstvenem področju sistemskih pristopov v izobraževanju.
- Pozna temeljne vire informacij, kje so objavljeni raziskovalni projekti za to področje.
- Pozna pojem in primere kompleksnih sistemov.
- Prepozna in razume zvezo med strukturo, dinamiko in razvojem kompleksnih sistemov.
- Razume linearost, nelinearnost in pomen pozitivnih in negativnih povratnih zank v kompleksnih sistemih.
- Razume osnove samoorganizacije v kompleksnih mnogodelčnih sistemih in emergentnih lastnosti.
- Zna kritično opredeliti ključne spremenljivke in parametre, ki odločilno vplivajo na dinamiko izbranega sistema.
- Spozna osnove dinamike mrežnih dinamičnih sistemov.
- Spozna orodja za obravnavo dinamike kompleksnih sistemov, ki je osnova razvijanja prenosljivih kompetenc obravnave sistemov na različnih področjih.

Intended learning outcomes:

Knowledge and understanding:

- The student is able to find key literature and other sources important for the research of systems approaches in education.
- Knowledge about the basic sources of information concerning the research projects in the field.
- Knowledge about the term complex systems and examples.
- Recognising and understanding the relationship between the structure, dynamics, and evolution of complex systems.
- Understanding the linearity, non-linearity, and the role of positive and negative feedback loops in complex systems.
- Understanding the self-organisation in complex multi-agent systems and the emergent properties.
- Critical evaluation of the key variables and parameters that crucially influencing the dynamics of a given system.
- Basic knowledge about the networks.
- Knowledge about the methods for analysing the dynamics of complex systems, which is the basis for developing the transferable competences for analysing systems in different fields.

Metode poučevanja in učenja:

- Predavanja
- Teoretične vaje
- Seminar

Learning and teaching methods:

- Lectures
- Theoretical exercises
- Seminar

študijskih obveznosti:

| | |
|-------------|-------|
| Ni pogojev. | None. |
|-------------|-------|

Vsebina:

- Aktualne raziskave na področju športne aktivnosti in zdravja
- Analiza raziskav
 - Metodologija raziskovanja
- Vpliv telesne aktivnosti na človekov organizem
- Metabolicne, srčno-žilne, respiratorne, hormonske in druge spremembe pod vplivom telesne aktivnosti
- Telesna aktivnost in zdravje
- Telesna aktivnost, bolezni srca in ožilja, dihalne bolezni
 - Telesna aktivnost in debelost, slatkorna bolezen, rak, kosti
 - Telesna aktivnost in mentalno zdravje

Content (Syllabus outline):

- Current studies of sport activity and health
- Analysis of relevant studies
 - Methodology of research work
- Effects of physical activity on human organism
- Metabolic, cardiovascular, respiratory, hormonal and other responses to physical activity
- Physical activity and health
- Physical activity, cardiac, vascular and respiratory morbidities
 - Physical activity and obesity, diabetes mellitus, cancer, bone health
 - Physical activity and mental health
 - Physical activity, fitness and children
 - Risk of physical activity

- Telesna aktivnost, telesna pripravljenost in otroci
- Tveganja pri telesni aktivnosti

Temeljni literatura in viri / Readings:

- Škof B. (2010). Spravimo se v gibanje - za zdravje in srečo gre. Ljubljana: Fakulteta za šport.

Cilji in kompetence:

Cilj predmeta je, da si študent pridobi znanje o raziskovanju na področju športnih aktivnosti in zdravja.

Objectives and competences:

The objective of this course is to give students knowledge of research on sport activities and health.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent sposoben:

- izkazati znanje o telesnih aktivnostih in zdravju
- razumeti vpliv telesne aktivnosti na človekov organizem in zdravje
- načrtovati raziskave na področju športnih aktivnosti in zdravja
- izbrati in uporabiti ustrezne raziskovalne metode
- uporabiti pridobljeno znanje v praksi

Prenesljive spremnosti in drugi atributi

- *Spretnosti komuniciranja:* ustno izražanje pri zagovoru seminarja in pri ustnem izpitu
- *Uporaba informacijske tehnologije:* uporaba programskih orodij pri raziskovanju
- *Reševanje problemov:* sposobnost reševanja problemov pri raziskovanju ter

Intended learning outcomes:

Knowledge and understanding:

After completion of this course the student will be able to:

- demonstrate knowledge of physical activity and health
- to understand the effects of physical activity on the human organism and health
- design research work in the field of physical activity and health
- select and use of adequate research methods
- use of acquainted knowledge in the practice

Transferable Skills and other attributes

- *Communication skills:* oral expression at seminar, manner of expression at oral examination.
- *Use of information technology:* use of software tools by the research work
- *Problem solving:* ability to solve problems in research work and at the application of

- Kompare, A idr. Psihologija. Spoznavanja in dileme. Ljubljana, DZS, 2001.

Cilji in kompetence:

Cilj predmeta je študentom podati poglobljeno teoretično znanje o bistvu ustvarjalnosti in o divergentnih in konvergentnih produkcijah, ki se izrazijo kot manifestacija ali potencialna možnost, prav tako pa podati znanje o uporabi metode za prepoznavanje ustvarjalnega procesa in produkta ter o uporabi teoretičnih znanj o ustvarjalnosti, za analizo in vrednotenje ustvarjalnega procesa in produkta ter na koncu razviti sposobnosti študentov za samostojno in poglobljeno reševanje praktičnih problemov na področju tehničke ustvarjalnosti.

Objectives and competences:

The objective of this course is to acquaint students with profound theoretical knowledge on the essence of creativity and modern definitions on divergent and convergent productions, reflected as manifestation or potential possibility but also to acquaint students how to use the method for recognizing the creative process and product and to use theoretical knowledge on creativity, for analyzing and evaluating the creative process and product and finally to develop the students' abilities for an independent and profound solution of practical problems in the field of technical creativity.

Predvideni študijski rezultati:

Znanje in razumevanje:

- Po zaključku tega predmeta bo študent sposoben
- izkazati poznavanje teoretičnih osnov in zakonitosti o bistvu ustvarjalnosti;
 - izkazati razumevanje sodobnih opredelitev divergentne in konvergentne produkcijah, ki se izrazijo kot manifestacija ali potencialna možnost;
 - uporabiti metod za razvijanje ustvarjalnih tehničkih sposobnosti;
 - izkazati prepoznavanje, evidentiranje, razvijanje in evalviranje rezultatov in dosežkov ustvarjalnega procesa;
 - uporabiti projektno nalogu kot možnost za razvijanje faktorjev divergentne in konvergentne produkcije;

Prenesljive/klučne spremnosti in drugi atributi:

- kombinirana uporaba različnih znanj za reševanje praktičnih problemov na področju tehničke ustvarjalnosti;
- uporaba projektne naloge za presojanje ustvarjalnega procesa in produkta.

Intended learning outcomes:

Knowledge and understanding:

On completion of this course the student will be able to

- know the theoretical bases and legitimacies on the essence of creativity;
- understand modern definitions of divergent and convergent production, reflected as manifestation or potential possibility;
- use the methods for developing creative technical abilities
- recognize, control, develop and evaluate the results and achievements of a creative process;
- to use the project work as a possibility for developing the factors of divergent and convergent production;

Transferable/Key Skills and other attributes:

- combined usage of various knowledge for the solution of practical problems in the field of technical creativity;
- to use the project work for the estimation of a creative process and product.

Metode poučevanja in učenja:

- frontalna predavanja,
- izdelava seminarske naloge.

Learning and teaching methods:

- frontal lectures,
- seminar work.

Članki iz tekoče domače in tuje periodike / Contemporary scientific articles

Cilji in kompetence:

Študenti poznajo različne opredelitve, modele, teorije nadarjenosti in raziskave s področja nadarjenosti, jih zmorejo evalvirati in uporabiti pri svojem praktičnem in raziskovalnem delu.

Objectives and competences:

Students are familiar with different definitions, models, theories of giftedness and giftedness research and are able to evaluate them and apply them to their practical and research work.

Predvideni študijski rezultati:

Znanje in razumevanje:

Študenti:

- razumejo pojem nadarjenosti in ga znajo umestiti v odnosu do inteligenčnosti, ustvarjalnosti in osebnosti.
- se seznanijo z osnovnimi tehnikami identifikacije nadarjenih posameznikov.
- zmorejo usmerjati in voditi nadarjene učence

Prenesljive/klučne spremnosti in drugi atributi:

- so sposobni kritično primerjati in presojati različne raziskave s področja nadarjenih učencev.
- se zavedajo odprtih vprašanja na področju znanstvenega preučevanja nadarjenosti
- raziskovalne ugotovitve zmorejo ustrezno uporabiti pri lastnem delu z nadarjenimi.
- Se zavedajo pomena refleksije lastnega dela za uspešno delo z nadarjenimi

Intended learning outcomes:

Knowledge and Understanding:

Students:

- understand the conception of giftedness and its relation to intelligence, creativity and personality dimensions.
- know the main techniques for identifying and educating gifted individuals.
- are able to direct and guide gifted students.

Transferable/Key Skills and other attributes:

- are able to critically compare and assess different studies in the field of giftedness research
- are aware of open dilemmas in the field of giftedness research
- are able to apply the research findings in their work with gifted students
- are aware of the importance of teacher reflection in working with gifted students

Temeljni literatura in viri / Readings:

A) Temeljna literatura:

- Dragica Haramija, 2012: *Nagrajene pisave*. Murska Sobota: Franc-Franc.
- Dragica Haramija, Janja Batič, 2013: *Poetika slikanice*. Murska Sobota: Franc-Franc.
- Igor Saksida, 2001: Mladinska književnost. *Slovenska književnost III*. Ur. Jože Pogačnik. Ljubljana: DZS. 403-468.
- Igor Saksida, 2005: *Bralni izzivi mladinske književnosti*. Založba Izolit, Domžale.

B) Viri bodo objavljeni na spletni strani (približno 30 knjig).

Cilji in kompetence:

Cilj tega predmeta je poglobojeno spoznati vrste in žanre v mladinski književnosti ter samostojno interpretirati književna dela iz različnih književnih vrst (lirika, epika, dramatika). Študent spozna sodobna teoretična izhodišča v preučevanju mladinske književnosti, ki jih zna smiselnouporabiti pri branju mladinske literature in samostojni poglobojeni interpretaciji le-te. Spozna tudi knjižno vzgojo (dejavniki kakovostne leposlovne in informativne mladinske literature). Analizira in interpretira izbrana mladinska književna dela.

Objectives and competences:

The objective of course is getting to know types and genres of children's literature and autonomous interpretation literary texts from different literary types (lyric, epic, drama). The student becomes acquainted with modern theory for studying children's prose and can then make meaningful use of it when reading children's literature and independently carrying out in-depth interpretations. Student also learns literary education (factors of quality belletristic and informative children's literature). Analyzes and interprets of select children's literature.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predavanja bo študent sposoben:

- izkazati znanje in razumevanje mladinske književnosti,
- interpretirati književna besedila,
- razumeti žanrske strukture tekstov,
- razumeti multimodalnost v slikanicah.

Prenesljive/ključne spremnosti in drugi atributi:

- Spremnosti: pisno izražanje pri seminarski nalogi, ustno izražanje na izpitu.
- Reševanje problemov: sposobnost reševanja književnih problemov v različnih kontekstih.

Intended learning outcomes:

Knowledge and Understanding:

On completion of this course the student will be able to:

- demonstrate knowledge and understanding of children's literature,
- interpret literary works,
- understand genres structures in texts
- understand multimodality in picture books.

Transferable/Key Skills and other attributes:

- Skills: manner of expression at written seminary paper, oral on oral examination.
- Problem solving: ability to solve literary problems in various contexts.

Metode poučevanja in učenja:

Predstavitev vsebine ob spodbujanju študentov k problemškemu pristopu in reševanju načrtovanih specifičnih problemov. Predavanja. Interpretacija knjig s področja mladinske književnosti. Spodbujanje študentov za aktivno soustvarjanje in vključevanje v poglobljene vsebine ter kritično presojo.

Learning and teaching methods:

Presentation together with encouraging student for problem approach and solving pre planned specific problems. Lectures. Book interpretation from the field of children's literature. Encouraging students for active co-creation and inclusion in profound contents and critical judgement.

Cilji in kompetence:

Cilj tega predmeta je podati študentom poglobljeno teoretično znanje o tiskem delu in njegovimi učinkovitimi prijemi in jih usposobiti za samostojno in učinkovito uporabo teh znanj v pedagoški praksi.

Objectives and competences:

The objective of this course is to provide students with detailed theoretical knowledge about teamwork and its effective implementation and to prepare students for autonomous and successful use of this knowledge in pedagogical practice.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent sposoben:

- izkazati znanje in razumevanje pojmov timskega dela,
- identificirati in rešiti probleme povezane s tiskim delom v šoli in jih uporabiti na drugih področjih,
- pokazati sposobnost učinkovite medosebne komunikacije v učinkovitem timu.

Prenesljive/kliučne spremnosti in drugi atributi:

- Spretnosti ustvarjanja učinkovitega tima
- Spretnosti komuniciranja
- Reševanje problemov v timu

Intended learning outcomes:

Knowledge and Understanding:

On completion of this course the student will be able to:

- demonstrate knowledge and understanding concepts of the team work,
- identify and solve problems related to the team work and use them in other areas,
- show ability of effective human communications in effective team.

Transferable/Key Skills and other attributes:

- Skills for the effective team
- Communication skills
- Problems solving in the team

Cilji in kompetence:

študente seznaniti z različnimi teorijami izobraževalnih politik; strategijami, cilji, pristopi (primerjalni vidik), analiza izobraževalnih sistemov; vloge, družbenega statusa in učiteljeve osebnosti ter jih naučiti ob upoštevanju zakonodaje pravilno spremljati in vrednotiti le-te v slovenski družbi in primerjati z drugimi družbami EU in širše.

Objectives and competences:

are to acquaint students with different educational policies' and theories, strategies, goals, aims and approaches (comparative view), analyse of educational systems; teacher's role, his social status and his personality and teach them, by consideration the legislation, how to understand the regulary attendance and evaluation of it in slovene society in comparison with other societies of EU and wider.

Predvideni študijski rezultati:

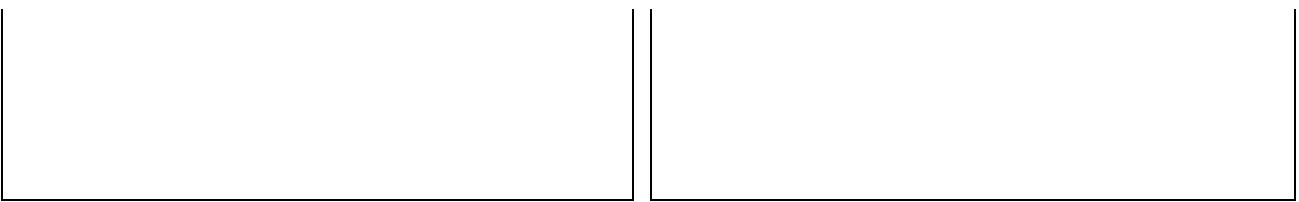

Znanje in razumevanje:

- pomena šolske realnosti in vloge učitelja za spremljavo učenčevega dela v primarnem izobraževanju
- dejavnikov procesnega in učno ciljnega pristopa poučevanja relacije: »Učenje - znanje - razumevanje« v odnosu do učitelja,
- identificiranjai in rešitve problemov povezanih z kompleksnostjo učiteljevih vlog in aktivnosti, povezanih z izobraževalnim sistemom,osnovnim izobraževanjem,
- pokazati sposobnost načrtovanja opisnih kriterijev in opisnikov v slovenskem sistemu izobraževanja.

Intended learning outcomes:

Knowledge and understanding:

- of sense of school reality for pupils accompaniment in elementary education,
- process and content-aims accession of teaching on relation »Teaching- Knowledge-Understanding« inside the teacher's role,
- identify and solve problems connected with usage different complex characteristics of determination of teacher's roles, and activities related to slovene educational system, elementary education,
- show ability of planning descriptive criterions and specifications inslovene educational system.

**Metode poučevanja in učenja:**

- predavanja,
- konzultacije.

Learning and teaching methods:

- lectures,
- consultations.

Sagadin, J. (2003). *Statistične metode za pedagoge*. Maribor: Obzorja.

Cilji in kompetence:

Cilj tega predmeta je usposobiti študente:

- za diferenciacijo kriterijev ugotavljanja kakovosti kvalitativnega in kvantitativnega raziskovanja ter njihovo upoštevanje pri izvajanju raziskav,
- za avtonomno sodelovanje in izvajanje kompleksnejših empiričnih raziskav,
- za izbiro in uporabo multivariatnih statističnih metod s SPSS,

Objectives and competences:

The objective of this course is to enable the students:

- for the differentiation of criteria in defining the quality of qualitative and quantitative research, and application of those in carrying out research,
- for autonomous participation in and implementation of complex empirical research,

|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent zнал in razumel

- temeljne karakteristike kvalitativnega in kvantitativnega raziskovanja,
- kriterije ugotavljanja kakovosti kvalitativnega in kvantitativnega raziskovanja,
- metodologijo izvajanja kvalitativnih in kvantitativnih raziskav,
- multivariatne statistične metode (multipla regresija, več faktorska analiza variance, faktorska analiza).

Intended learning outcomes:

Knowledge and understanding:

On completion of this course the student will know and understand:

- general characteristics of qualitative and quantitative research,
- criteria for defining the quality of qualitative and quantitative research,
- methodology for carrying out complex quantitative and qualitative research,
- multivariate statistical methods (Multiple Regression, Faktorial ANOVA, Exploratory Factor Analysis).

Metode poučevanja in učenja:

- predavanja,
- laboratorijske vaje

Learning and teaching methods:

- lectures,
- labor work

- članki iz tekoče, predvsem tuje periodike

Cilji in kompetence:

- Razširijo svoje znanje o didaktičnih strategijah.
- Razširijo svoje znanje o konceptih pouka.
- Znajo pripraviti instrumentarij za raziskovanje didaktičnih strategij.

Objectives and competences:

- Expand their knowledge about didactical strategies.
- Expand their knowledge about lesson concepts.
- To know how to prepare a base for investigation of didactical strategies.

Predvideni študijski rezultati:

Znanje in razumevanje:

- Poglobljeno poznavanje in razumevanje didaktičnih strategij.
- Poglobljeno razumevanje konceptov pouka.
- Sposobnost kritične uporabe znanstvenih in strokovnih spoznanj s področja didaktičnih strategij.
- Sposobnost samostojnega raziskovanja.
- Sposobnost jasnega pisnega in ustnega izražanja.

Intended learning outcomes:

Knowledge and understanding:

- Familiarity with and understanding of the didactical strategies.
- Familiarity with an understanding of conceptions of lesson.
- Ability of critical use and apply scientific and professional findings of didactical strategies.
- Ability of independent researching.
- Ability of clear writing and orally expression.

Metode poučevanja in učenja:

- predavanja,
- razgovor,
- obravnava študijskih primerov,
- delo z besedilom,
- multimedija predstavitev

Learning and teaching methods:

- interactive lectures,
- discussion,
- case studies discussion,
- working with texts,
- multimedia presentation.

Kurikulum in raziskovanje. Reflektivno poučevanje kot dejavnik raziskovanja profesionalnega razvoja učiteljev. | <ul style="list-style-type: none"> Approaches, methods and techniques for the study of didactics of elementary education. Courses in didactics and their influence on elementary education. Definition and development of curriculum theory. Strategies of planning. Relationship between strategies of planning. Advantages and disadvantages of each strategy. Development of curriculum for different fields of education. Curriculum and research. Reflective teaching as a study factor of professional development of teachers. |

Temeljni literatura in viri / Readings:

- Campbell, A., McNamara, O., Gilroy, P. (2004). Practitioner Research and Professional Development in Education. London: Paul Champman Publishing..
- Lankshear, C., Knobel, M. (2006). A handbook for Teacher Research. London: Open University Press.
- Pinar, W. F. (2004). What Is Curriculum Theory? Routledge.
- Trahar, S. (2006). Narrative Research on Learning. Comparative and International Perspectives. United Kingdom by Cambridge University Press.
- Wragg, E.C. (2004). An Introduction to Classroom Observation. London and New York: Routledge.
- članki iz tekoče, predvsem tuje periodike

Cilji in kompetence:

- Razširijo svoje znanje o razvoju didaktike in njenem vplivu na primarno izobraževanje.
- Razširijo svoje znanje o raziskovanju didaktičnih pojavov na elementarni stopnji izobraževanja.
- Se seznavajo z razvojem kurikularne teorije.
- Spozna različne strategije načrtovanja kurikula in jih kritično ovrednoti.
- Spozna različne vrste kurikulov.
- Se usposablja za pripravo kurikula na različnih področjih šolanja.
- Razširijo svoje znanje o raziskovanju profesionalnega razvoja učiteljev.

Objectives and competences:

- Expand their knowledge about development of didactics and its influence on elementary education.
- Expand their knowledge about investigation of didactical phenomena on elementary education.
- Gets familiar with development of curriculum theory.
- Gets to know different types of curriculum.
- Gets to know different strategies of curriculum development and critically evaluates them.
- Expand their knowledge about investigation of teacher's professional development.

Predvideni študijski rezultati:**Znanje in razumevanje:**

- Poglobljeno poznavanje in razumevanje predmeta didaktika, razvoja didaktike, vpliva didaktike na primarno izobraževanje.
- Poglobljeno razumevanje raziskovanja didaktičnih pojavov.
- Analizira strategije načrtovanja in se na osnovi potreb in konkretne situacije zna odločiti za najustreznejšo.
- Sposobnost kritične uporabe znanstvenih in strokovnih spoznanj s področja didaktike.
- Sposobnost samostojnega raziskovanja.
- Sposobnost jasnega pisnega in ustnega izražanja.

Intended learning outcomes:**Knowledge and understanding:**

- Familiarity with and understanding of the subject of didactics, development of didactics and influence of didactics on elementary education.
- Familiarity with an understanding of investigation of didactical phenomena.
- Analyzes strategies of planning and based on needs and situation knows to decide for the right one.
- Ability to critically use and apply scientific and professional findings of didactics.
- Ability of independent researching.
- Ability of clear writing and orally expression.

Metode poučevanja in učenja:**Learning and teaching methods:**

Vsebina:

- Inkluzija in deinstitucionalizacija;
- Sistemski model razvoja inkluzivnega izobraževanja (učenec – strokovnjaki – šola – lokalno okolje);
- Dejavniki uspešne inkluzije in ovire;
- Inkluzija in učenci z vedenjskimi/
čustvenimi motnjami (VČM), dileme
vključevanja učencev z VČM, sprejemanje

Content (Syllabus outline):

- Inclusion and deinstitutionalization;
- The systemic model of inclusive education (student – professionals – school - local district);
- Factors for successful inclusion and barriers;
- Inclusion and students with behavioral/emotional disorders (BED),

| | |

 - Hozjan, D. (Ur.) in Strle, M. (Ur.) Inkluzija v sodobni šoli (2012). Koper: Univerza na Primorskem, Znanstveno-raziskovalno središče, Univerzitetna založba Annales.
 - Brown, I. in Percy, M. (2006). Intellectual and developmental disabilities. Brookes Publishing, Baltimore, London, Sydney.
- Uporaba izvirnih znanstveno-raziskovalnih prispevkov, predvsem iz tujih znanstvenih revij.

Cilji in kompetence:

Cilj predmeta je, da študentje nadgradijo znanje in razumevanje o socialnem modelu obravnave oseb s PP v inkluziji, se poglobljeno in kompleksno seznanijo s prepletostjo delovanja podsistemov v procesu inkluzije, z ovirami in dejavniki uresničevanja inkluzije s poudarkom na vključevanju učencev z VČM in MDR ter razširijo znanje in razumevanje o konceptualnem modelu kvalitete življenja oseb s PP in družin. Eden od ciljev je tudi poznavanje izidov najrelevantnejših sodobnih domačih in mednarodnih raziskav iz področja inkluzije.

Objectives and competences:

The objective of this course is that students understand the social model of treatment of persons with SN in inclusion and to achieve deeper and more complex knowledge about interconnection of subsystems in the process of inclusion, with barriers and factors of implementing inclusion by focus on including the students with BED and students with ID. Student disseminate the knowledge and understanding of conceptual model of quality of life of persons with SN and families. One of the objectives is acquiring the knowledge of

| | |
|--|---------------------------------------------------------------------------|
| | outcomes on relevant and contemporary domestic and international studies. |
|--|---------------------------------------------------------------------------|

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent sposoben

- izkazati poglobljeno znanje in razumevanje socialnega modela obravnave,
- kritično demonstrirati znanje o razvoju in ovirah inkluzije,
- poglobljeno analizirati delovanje podsistemov v inkluziji,
- identificirati vidike kvalitete življenja družin z osebami s PP in ovrednoti učinkovitost konceptualnega modela kvalitete življenja v inkluziji,
- primerjati in analizirati raziskovalne izsledke na področju inkluzije v domačem in mednarodnem prostoru.

Intended learning outcomes:

Knowledge and understanding:

On completion of this course the student will be able to

- demonstrate deeply engagement in the knowledge and understanding of the social model of treatment,
- critically demonstrate the knowledge about development and barriers of inclusion,
- deeply analyse the functioning of subsystems in inclusion,
- identify the aspects of quality of life of families with persons with SN and evaluate the efficacy of conceptual model of quality of life,
- compare and analyse research results on the field of inclusion in domestic and international area.

Metode poučevanja in učenja:

- Predavanje vsebin ob vzpodbujanju študentov k reševanju problemov.
- Vaje so usmerjene v povezovanje teorije in prakse, potekajo v manjših skupinah.

Learning and teaching methods:

- Lectures with discussion and problem solving methods.
- Exercises and projects aim to connect theory and practice; they include working in small groups.
